

TRAFFIC MANAGEMENT FLOW DURING CONSTRUCTION

June 13, 2014

Dear Valued Citizen

Within the next few days construction begins along Josiah Gumede Road (Old Main Road) which will be closed at the bridge under St Johns Avenue. This is for the development of a section of GO!Durban - the Integrated Rapid Public Transport Network (IRPTN) which is being constructed for the Ethekewini Municipality. The traffic will be rerouted around the bridge with two lanes in each direction. These roads have kerbside parking which will no longer be available and only off-road parking will be permitted.

On completion of construction of this section, the traffic will continue to be rerouted around the bridge but there will be three lanes in each direction which will ease traffic congestion in the future. The underpass will become a right of way for the new BRT (Bus Rapid Transit).

The expected completion date of construction is December 2015.

GO!Durban will eventually provide a more efficient, safer and faster public transport service for the citizens of the City. The City greatly appreciates your patience in this regard and apologises for any inconvenience this may cause you during this period.
